

## DESIGN IN PUBLIC SPACES – DISCUSSION ON ERGONOMICS AND ARCHITECTURE

Design in public spaces – discussion on ergonomics and architecture, Przemek Stopa

The lecture will show us methods applied when planning public spaces. It will present the most important aspects of the subject, and discuss the most common mistakes in the process of designing and how to avoid them. A space planning expert will tell us about his work – the road that every design has to follow to become a success. He will reveal his principles in designing and introduce the DuPont™ Corian® material, which provides unique opportunities in creation of space.
