INTERIOR DESIGN

XPLAN IN CANADIAN STYLE

Xplan has completed the interior design and construction work for Canada Brokers' new offices in Concept Tower in Warsaw. The company has occupied an area of 205 sqm in the office building, which is located at the junction of ul. Grzybowska and ul. Karolkowa. The work was carried out according to a design by architect Katja Sadziak. The interior has been given significant but discreet red elements, referring to Canada Brokers' logo. In addition, the office has six studies, a conference hall, a reception area and a kitchen.

MAC'S TABLE OFFICIALLY GOOD

The Mac's Table, which is the latest creation of designer Mac Stopa of Massive Design for Tonon, is a table featuring unique legs with a sculpted organic shape, which provides countless possibilities in terms of configuring the table's base. The reversible, modular geometry of the legs allows endless configurations of the table's base, the surface of which is available in many different shapes and sizes. The module base is available in three finishes: American walnut, oak veneer and soft, medium density polyurethane foam in twelve colours. Mac's Table won the Good Design™ Award 2014 and the Best of Boutique Design/NY Product Design Award 2014.

THROUGH THE LOOKING GLASS

Pilkington MirroView™ is an LCD screen hidden behind a mirror. The NSG Group has now launched the product onto the Polish market. It features multimedia screens that disappear when you turn them off into a perfectly smooth mirror, which is neutral for the character and style of any room. Its mirrored appearance is provided by a highly reflective coating applied to clear float glass. The use of Pilkington MirroView™ glass lets you place a TV set in locations where a large screen simply does not fit or where there is no space for it. It can also be used in bathrooms thanks to the resistance of the mirror coating to water – and will certainly work well in hotel bathrooms, swimming pools and spa centres.
